SUMMARY

- Flutter Developer with nearly 3 years of experience delivering production mobile applications for startups and enterprise clients across real-time communication, ride-hailing, food delivery, and eCommerce platforms. Specializes in Flutter, Dart, WebRTC, WebSockets, and Firebase, owning features end-to-end from development and API integration through debugging, testing, and App Store/Google Play deployment. Proven track record resolving complex real-time and platform-specific (iOS/Android) issues under production constraints.

SKILLS

- Languages & Mobile:** Dart, Flutter, Java, C#, JavaScript, Android, iOS, Cross-Platform Development, Responsive UI
- Architecture & State Management:** MVVM, Clean Architecture, BLoC, Riverpod, GetX
- Real-Time & Communication:** WebRTC, VoIP, WebSockets, Audio/Video Calling, Push Notifications, Firebase Cloud Messaging (FCM), Deep Linking
- Backend, APIs & Cloud:** Firebase, Firestore, Firebase Authentication, Supabase, REST APIs, Node.js, Google Maps API, Stripe, Braintree
- Tools & Deployment:** Git, GitHub, Postman, Android Studio, VS Code, Agile/Scrum, App Store & Google Play Deployment

EDUCATION

Mehran University of Engineering and Technology (MUET)

Jamshoro, Pakistan

Bachelor of Engineering in Software Engineering

2021 – 2025

- Final Year Project – Green Streak:** Developed a Flutter and Node.js social media application focused on promoting tree planting, plant care, and environmental participation through community engagement.
- Key Features:** Activity streaks, points, achievements, virtual gardens, recurring challenges, reminders, plant-care guidance, community planting maps, and a seed marketplace.

WORK EXPERIENCE

GupZar Technologies

Karachi, Pakistan

Flutter Developer

Jan 2026 – Present

- GupZar – Social and Communication Platform:** Develop and maintain a production real-time chat and VoIP communication application for a UAE-based startup using Flutter, Dart, WebRTC, WebSockets, Firebase, and cross-platform integrations for iOS and Android.
- Real-Time Communication:** Develop real-time messaging, audio and video calling, call logs, notifications, blocked contacts, media messaging, and related communication features.
- WebRTC and Calling:** Work on reconnection workflows, ICE candidate handling, signaling events, socket synchronization, media delivery, and platform-specific calling behavior to support reliable real-time communication.
- Platform-Specific Development:** Troubleshoot iOS and Android issues involving incoming calls, CallKit, Bluetooth, notifications, background behavior, and audio handling.

Trizolt

Remote – Europe

Flutter Developer

Dec 2025 – Jan 2026

- GOZOLT – Ride-Hailing and eCommerce Super-App:** Developed features for a multi-service Flutter platform combining ride booking, eCommerce, and rental services for the Malta market.
- Real-Time Driver Tracking:** Implemented real-time driver tracking, dynamic fare calculation, Google Maps functionality, Firebase Authentication, and Firestore-based data management.
- Enterprise Mobile Development:** Built and maintained enterprise mobile applications for international clients within a microservices-based environment.
- Real-Time Communication:** Implemented WebSocket-based real-time chat and customer support functionality.

AZ Solutions

Hyderabad, Pakistan

Flutter Developer

Feb 2024 – Jan 2026

- Local Vendee – Food Delivery Platform:** Developed a multi-role food delivery platform with dedicated User, Vendor, and Driver workflows and dashboards.
- Real-Time Food Delivery:** Implemented real-time order tracking, role-based workflows, audio and video calling, and payment processing, plus led Flutter development for related B2B and ride-hailing use cases.
- Backend and Third-Party Integrations:** Integrated Firebase, Firestore, Firebase Authentication, Google Maps API, payment gateways, real-time tracking, and REST APIs across multiple applications.
- Agile Delivery:** Gathered requirements with clients, implemented production features, troubleshoot application issues, and delivered work through Agile two-week sprint cycles.
